NG regulation and measurement station

Sector: Infrastructure.

Location: Catamarca, Argentina.

Scope: Design and modular construction of a natural gas metering and regulation panel in accordance with NAG 100 regulations. The project included the laying of pipes, connection and commissioning.

We develop the following documents:

- Civil Engineering.
- Mechanical Engineering.
- Electric engineering.
- Piping Engineering.
- Soil studies.
- Permits and approvals.

Total duration: 180 days.

Basic engineering

Sector: Infrastructure.

Location: San Luis, Argentina.

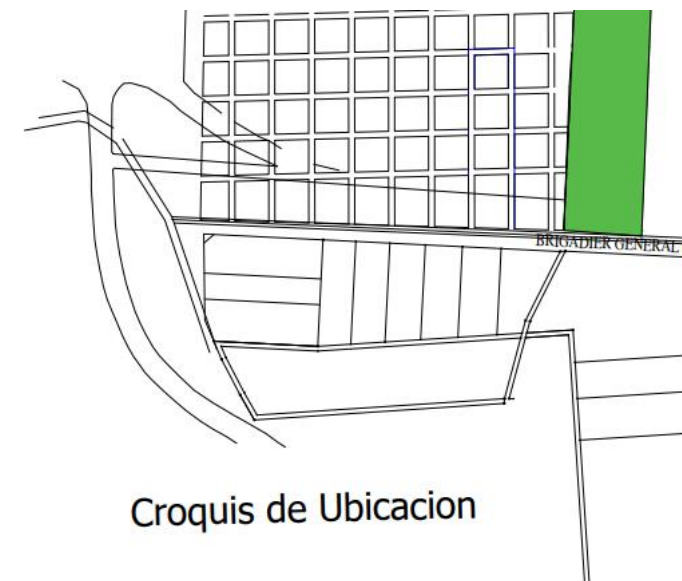

Scope: Development of basic engineering for urbanization of 12 hectares and 153 lots.

It included street layout, electrical distribution at 13.2 KV, water network and sewers.

We develop the following documents:

- Civil Engineering.
- Architecture.
- Electric engineering.
- Hydraulic engineer.
- Soil studies.
- Permits and approvals.

Total duration: 150 days.

Lighting Projects

Sector: Infrastructure.

Location: Argentina.

Scope: Design, construction, assembly and commissioning of numerous exterior and interior lighting projects. Smart energy management systems to improve efficiency.

We develop the following documents:

- Lighting engineering.
- Structural engineering.
- Electric engineering.
- Measurements.
- Monitoring systems.
- Permits and approvals.

Total duration: 180 days..

Basic engineering

Sector: Infrastructure.

Location: San Luis, Argentina.

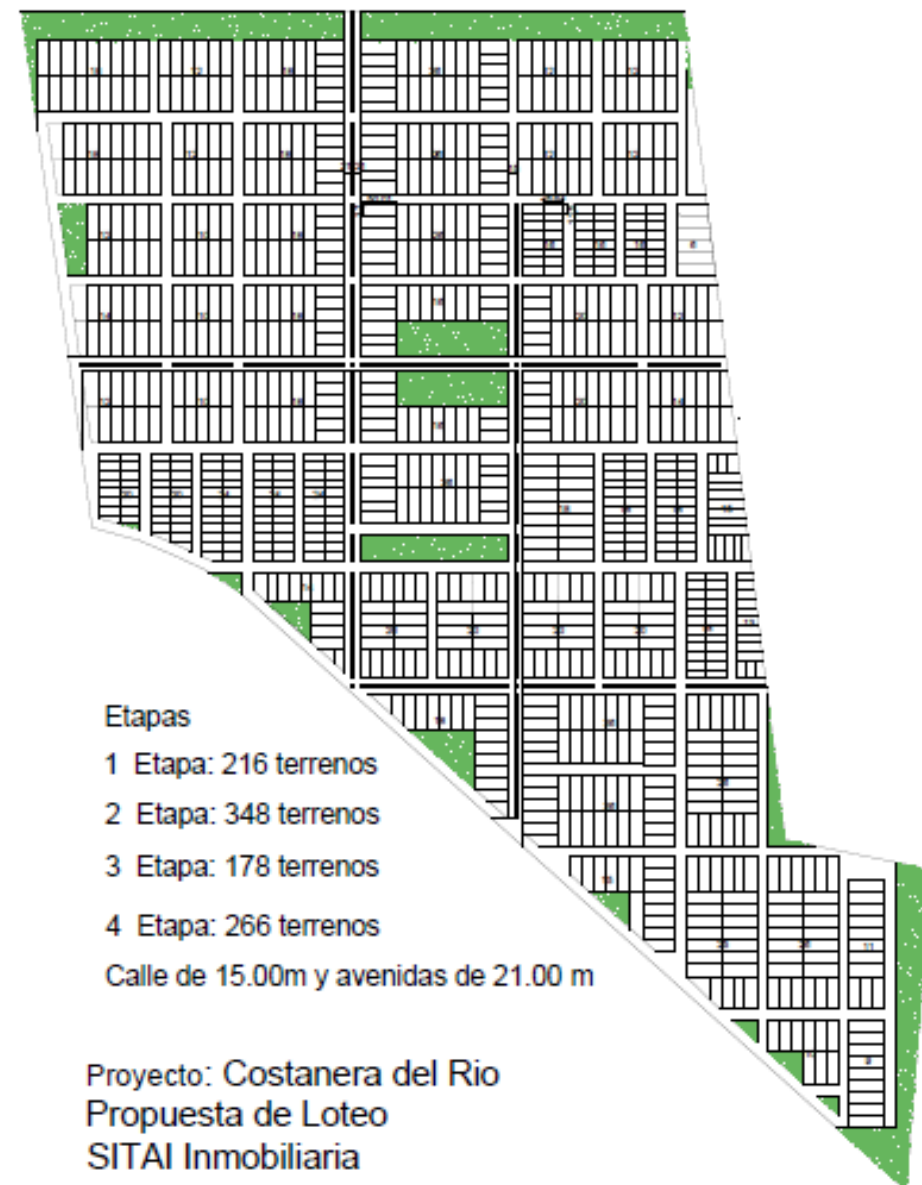

Scope: Development of basic engineering for urbanization of 117 hectares and 1,008 lots.

It included street layout, electrical distribution at 13.2 KV, water network and sewers.

We develop the following documents:

- Civil Engineering.
- Architecture.
- Electric engineering.
- Hydraulic engineer.
- Soil studies.
- Permits and approvals.

Total duration: 180 days.

Expansion of the Natural Gas network

Sector: Infrastructure.

Location: Catamarca, Argentina.

Scope: Design, construction, assembly and start-up of a new natural gas branch line.

Work carried out under NAG 100 regulations.

We develop the following documents:

- Civil Engineering.
- Mechanical Engineering.
- Electric engineering.
- Piping Engineering.
- Soil studies.
- Permits and approvals.

Total duration: 60 days.

Basic Aqueduct Engineering

Sector: Infrastructure.

Location: Salta, Argentina.

Scope: Design of the collection and transport system for 2,000 m³/day of water. Length of the aqueduct is 40 km. The provision included technical-economic analysis and permit management. We develop all the documents associated with the following specialties:

- Hydraulic engineer.
- Civil Engineering.
- Mechanical Engineering.
- Electric engineering.
- Control Engineering.
- Radio Link System.

Total duration: 240 days.
